

PRODUCT DESCRIPTION

Rosco LitePad™ is a slim profile light source that generates a soft even beam of light and almost no heat. Its small form factor and light weight make the Rosco LitePad™ perfect for use in many places where a larger, typical luminaire could not fit. Drawing just a few watts of power, LitePad™ is simple, fast and economical to use in film and television, theatre and live entertainment, and retail and event lighting.

Use Rosco LitePad™ for:

Accent lighting on and built into scenery:

Add light behind windows and doors with only 2.54cm of space between framing and opening.

Use LitePad™ as the source on the front of a TV or computer monitor, even for special effects like glowing props.

Backstage Lighting:

Gently illuminate hazardous areas such as stairs and platform edges.

Orchestra lighting.

Supplementary Lighting kit for stage or set:

Small soft sources provide additional light and can be mounted into virtually any nook on set.
